

**OWNER REPORT OF
IBMUS 302489
RACFPLEX AMPMVSA**

September 17th, 2012

This report shows all resources owned by IBMUS 302489 and
access to those resources

Explanation to the attached Report

PROFILE Entity to protect data from being accessed.

- **(D)** Discrete protection. A specific profile which protects only one specific file.
- **(G)** Generic protection. The profile can protect more than one file and depends on the "generic" character.

UACC Universal access. For all users in the system. Other than NONE requires written agreement. The following **Access Levels** are possible for RACF controlled profiles.

- **ALTER** Allows to allocate, delete, change, copy or read the data. This is the highest possible authorization.
- **CONTROL** Allows to change, copy or read the data. Is mainly valid for VSAM organised datasets.
- **UPDATE** Allows to change, copy or read the data.
- **READ** Allows to copy and read data.
- **EXECUTE** Allows to execute programs.
- **NONE** Prevents from any general access. Default value

Sec. Classification of the data which are protected.

- **IC** IBM Confidential
- **UCL** Unclassified
- **' '** no classification specified

AUDIT Specifies which access to be logged.

Owner Ident. Shows the identification of the responsible manager.

Name Name of the user

Access Self explanatory. The several levels are explained by UACC.

Status Type/Status of the userid

- **I** IBM regular employee
- **N** IBM Non-Regular employee
- **F** Functional userid (e.g. application user)
- **S** Started task / Service machine
- **T** Member of a IBM subsidiary where IBM holds more than 50%
- **E** External user
- **C** Customer
- **V** Vendor

Condition Access Is only possible by the specified condition.

Connect Connect authority and connect attributes

- **Use** Authority to access resources.
- **Create** Authority to allocate new group datasets and control access to the created profiles.
- **Connect** Authority to connect new userids to that group and assign USE, CREATE or CONNECT authority.
- **Join** Authority to define new groups which will be subgroups of that group.
- **Special** Group special attribute for the scope of that group
- **Operations** Group operations attribute for the scope of that group
- **Auditor** Group auditor attribute for the scope of that group
